

eValue8

THE STATE OF THE ART TOOL FOR VALUE BASED PURCHASERS

As health care costs continue to increase, you want evidence that you are purchasing quality health care, administrative excellence and consumer satisfaction at cost-effective prices. eValue8 makes it possible to both define health plan performance expectations and to evaluate their performance. With eValue8, purchasers can provide true health care value: health care that integrates leading-edge evidence-based practices at a fair cost.

WHAT IS eValue8?

- * Aligns purchaser standards and expectations.
- * Captures plan performance against evidence-based processes.
- * Benchmark regional and national plan performance.
- * Highly interactive, placing plans face-to-face with purchasers.
- * Provides a foundation for continuous quality improvement and value-based purchasing.

THE VALUE OF eValue8

eValue8 provides you with access to up-to-date information on health plan performance so that you can make informed decisions and negotiate agreements to receive the greatest value for your health care dollar. eValue8 prepares easy-to-compare performance reports that evaluates health care vendors on a local, regional and national level.

You can use eValue8 to:

- * Establish performance goals and measure quality based on leading edge purchaser expectations.
- * Identify results-oriented disease management programs.
- * Designate "best-in-class" performers.
- * Determine health promotion and education opportunities.
- * Develop targeted strategies for improving the value of your health care investments.
- * Collaborate with purchasers and health care providers to improve community health quality.
